Knürr Dacobas® -Consoles

Applications and Capabilities

Our ergonomically refined control consoles are used the world over and perform with excellent results in traffic control and airport operations and control centres. The demanding 24-hour operation in such environments is, of course, every bit as demanding on the operators as the technology in use.

The ergonomic workstation is important for the operator, just as the functionality of simple and rapid access is, so that the necessary components for the operation can be exchanged within minutes. This is where Knürr Dacobas® shows its strong points. - A transparent modular structure for creating the efficient interface between the control systems and the people that operate them. A flexible linking of the modules consequently enables the creation of the most diverse workstation environments.

DAC20181

DAC20202

Control and measurement consoles in the process industry are closely linked to the production process, and are therefore often exposed to quite severe conditions. Ergonomics are once again the center of focus in this area, but different technologies are utilized in each production process, and these require a high standard of flexibility with technical integration. This is where Knürr Dacobas® can fully implement the strengths that it has continually further developed over several decades.

KON20050

Knürr Dacobas®

Control Consoles

A special product area of the Knürr Dacobas® range is dedicated to the technical features of control consoles. This standard range allows most requirements to be covered, especially for RfPs – cost-effective, efficient and with short delivery times.

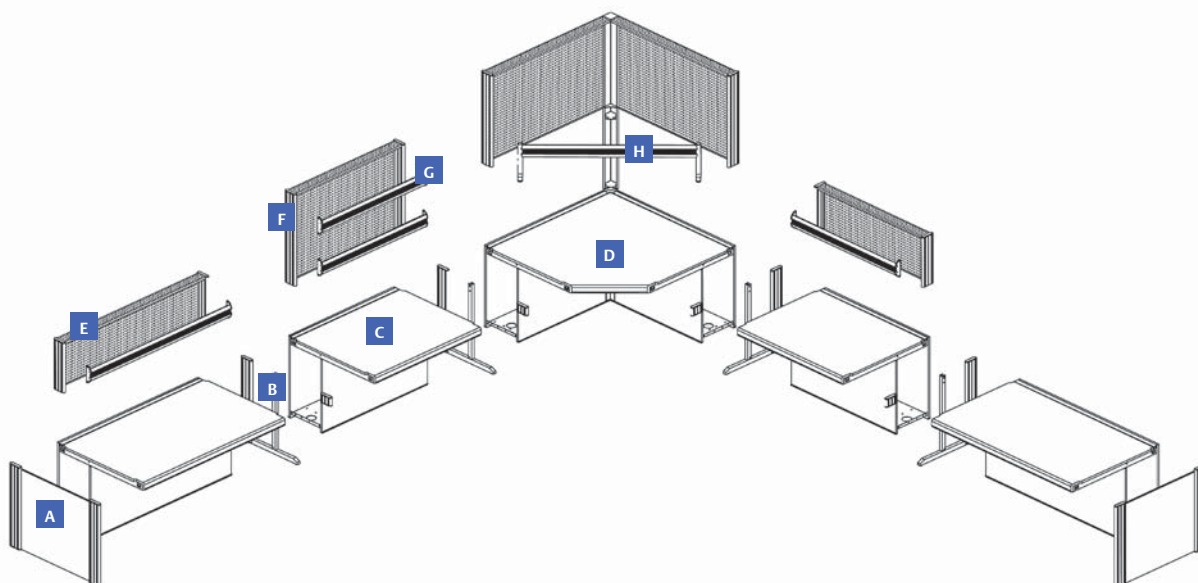

Technical pedestals, lowered monitors, 19" integration, cabling systems, console superstructures and flat screen holders generate an all-inclusive range that covers practically every requirement.

Customer specific requests in excess of our standard product range can be fulfilled by modifying standard articles or by creating bespoke solutions by our Customer Engineering.

Space management made easy!

Four basic modules enable room layouts for the most diverse applications:

- | | |
|--|---|
| A Knürr Dacobas® Closing Side Panel | E Knürr Dacobas® Perforated Rear Panel H450 mm |
| B Knürr Dacobas® Link-Up Side Panel | F Knürr Dacobas® Perforated Rear Panel H830 mm |
| C Knürr Dacobas® Worktop | G Knürr Dacobas® Functional Rail |
| D Knürr Dacobas® Corner | H Knürr Dacobas® Functional Rail Corner |

9 KON20043

Knürr Dacabas® Control Consoles Strong points

1 Ergonomics

Full front cover provides modesty screen for the leg area. The ergonomic leg space enables free movement of the chair in the link-up area.

Spacious desk depth of 1000 mm for setting up 550 mm (21") monitors.

2 Cable routing

For cabling and installation of equipment, front and rear covers completely removed.

3 Simple and dust protected cable entry from above in the cable duct. Brush strip across the entire desk width.

4 Additional work and storage surfaces are created with desktop superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level, lighting fixtures or rear panel.

5 Cable management

Separate horizontal and vertical cable routing in cable basket trays and cable routing rings. Easy cabling also via corner components.

6 The technical pedestal with a depth of 350 mm provides the option of integrating computers, mounting panels and 19" components.

7 Cable duct bottom opening of the double base in the technical pedestal or through the brush strip in the 19" pedestal. Optional ventilation in the covers.

8 19" Pedestal

Small smaract cabinet² with glass door and 19" extrusions for installing 19" components. Adapter for installing a lockable drawer, can also be mounted later on.

9 Drawer unit

Mobile drawer unit, 50/3x150 mm or 50/150/300 mm, can be positioned anywhere.

KON20027

Knürr Dacobas® Control Desk

Level working surface, one-piece front and rear covers

- Working level with full-cover worktop
- Control desk frame with integrated front and rear panel mounting
- Technical pedestal accessible from front and rear, clear depth - 350 mm
- Cable routing possible from above in the cable duct across the entire desk width
- Dust protection in the cable routing area with brush strip
- The technical pedestal is open on the side with link-up for horizontal cabling
- Full front and rear cover can be removed from the technical pedestal
- Technical bottom cover with cable entry, diameter 80 mm
- Technical bottom cover prepared for 19" frame mounting
- Prepared for socket strip

Load rating

- 1500 N (static surface load)

Standards

- DIN 68761 for worktop
- EN 438 HGS class for high pressure plastic laminate

Material / Finish

- Worktop: three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop coating: high pressure plastic laminate
- Desk frame: sheet steel, zinc passivated
- Front and rear covers: three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Technical bottom cover, powder-coated texture

Colour

- Worktop, front and rear covers: RAL 7035 light-grey
- Technical bottom cover, RAL 9011 graphite black

Supply schedule

- 1 Worktop with brush strip
- 1 Desk frame
- 1 Front cover
- 1 Rear cover
- 1 Mounting instructions
- Mounting material

How supplied

- Pre-assembled in modules

Note

- Please order socket strips separately
- The "push-lock" of the front and rear covers can be exchanged with a lock on request

Knürr Dacobas® Functional Rail

- For hanging on organisational accessories and flat screen holders
- Suitable for Knürr Dacobas® product line

Material / Finish

- Extruded aluminium extrusion, antistatic powder-coated, smooth, RAL 9006, white aluminium

Supply schedule

- 1 Functional rail
- Product-specific mounting material

How supplied

Flat-packed kit

Note

Type 2 is required for mounting flat screen holders!

Type 2 = Double functional rail

Knürr Dacobas® Rear Panel Level, lowered and control console corners

- Perforated rear panel suitable for control desks and control console corners
- Perforation: 8 mm in 25 mm pattern
- Privacy screen for monitors and monitor cables
- Retaining extrusions are set up and connected on existing control console

Material / Finish

- Perforated rear panel, sheet steel, powder-coated texture
- Retaining extrusion, extruded aluminium, powder-coated texture

Colour

- Perforated rear panel, RAL 7035 light-grey
- Retaining extrusion, RAL5008 grey-blue

Supply schedule

Control console

- 1 Perforated rear panel
- 2 IM profiles, length 450 mm resp. 830 mm
- Mounting material

45° Corner

- 1 Perforated rear panel
- Mounting material

Knürr Dacobas®

Circular Console

TFT Monitors, i.e. flat screens, are rapidly displacing the “tube technology” used to date. The space saving in the depth with desk and workbench systems is, of course, only guaranteed with a flat screen holder system, which makes the large support feet of the TFT unnecessary.

With systems with several flat screens, flat screen adaptations are a “must” at any rate.

Planning right from the outset with TFT adaption is the ideal solution, but flat screen adapters can also be integrated at any time later on, and this even with third party manufacturers.

Knürr Dacobas® circular console Strong points

1 KON20049

2 KON20050

3 KON20053

4 KON20054

4 KON20055

5 CIC20060

1 Modular concept

The trapezoid shape of the individual consoles creates a circular setup when linked-up, and consequently produces an optimal horizontal view and access area.

2 With straight and trapezoid shaped workstation components, individual workstation environments and combinations can be realised.

Linked-up technical desks extend the worktop surface.

3 Flat screen adapters

The flat screen adapters comply with the VESA-MIS D/D75 und 100 (drill hole spacing, 75 mm and 100 mm).

The arrangement of flat screens on two levels is enabled with Knürr-specific functional rails.

4 Equipping

The pedestal can be opened from both the rear and the front and is equipped with a pull-out shelf. Both 19" equipment and mounting panels for non-standard equipment can be mounted on 19" ex-trusions.

5 Monitor integration

Quick and easy installation of TFT monitors; all trade-standard sizes, on one or two levels. Flexible flat screen mounting with multifunctional rails.

Please also see our current
Knürr CiCon® brochure!

Knürr Dacobas®

Operator Consoles

KON00254

CRT monitors cannot be replaced by flat screens in some special applications. Knürr Dacobas® operator consoles that optimise screen reflexes, access, viewing angles and distances as well as heat dissipation are provided for such special applications.

A simple exchange of the heavy monitors is of decisive significance in this respect.

Further solutions on request

KON00076

Knürr Dacobas®

Height Adjustable Control Console

The new Knürr Security Command Workstation is designed as a versatile control console with the comfort and convenience of a sit-stand workstation. The variable, electric height adjustment of 680 mm to 1280 mm working height is even possible with angled combinations. With operations control consoles, it is crucially important that the operator be able to work standing up in stressful operation situations. The stressful situation is consequently less demanding for the operator and the error rate is lower.

KON20047

We are happy to offer project planning and offers with detailed CAD room planning on request.

KON20048

Knürr ErgoCon® – Strong points

- The most modern lifting mechanism possible ensures the worktop moves up and down quietly and stepless
- Intelligent and hidden cable management
- Ergonomic monitor connection guarantees optimum viewing angles
- Ergonomic and robust desktop edge

■ New standards in electro-motor height changes:

- Running very quietly and smoothly, the work height can be set individually and stepless between 680 and 1280 mm
- With its stepless height adjustment and practically noiseless lifting mechanism, Knürr has now opened a new chapter in electro-motor height adjustment
- Individually programmable height positions and speeds for various users
- Intermediate stop and slow mode when nearing end position
- Overload protection with individual current limiting
- In service cases: Fault identification with special codes, remote diagnostics setup, automatic detection of drives, swapping out the lifting columns during running operation, free access from outside via the removable side panels of the base units

Please also see our current
Knürr ErgoCon® brochure!

Knürr ErgoCon® – Control Room Console – Electric Height-Adjustable

ERG00019

TFT adaption

- Ergonomic monitor connection with to the circular functional rail guarantees optimum monitor viewing distances
- Freely positionable functional rail and monitor columns on the worktop and individual TFT mounting with grid perforation
- Height-adjustable functional rail for optimum monitor viewing angles
- Optimum monitor tilt angle with an electric height-adjustable monitor column

Ergonomic and robust desktop edge

- Warm synthetic materials ensure a pleasant surface temperature to positively influence the user's sensation and perception on touching and seeing the surface
- Knürr guarantees long lifecycles by using resistant and robust materials
- The solid-colored material precludes paint damage

ERG20058

Spacious technical pedestal

- For accepting mounting panels, chassis rails, computers and other equipment with full legroom with a width of 1600 mm or 2000 mm
- Cables can be routed through the cable basket tray to the side panels

ERG00006

Intelligent and hidden cable management

- Spacious, two-way cable chain in the base units with separator for separate cable routing
- Cable comb under the monitors – suitable for straight, concave and convex cable routing
- Cable management along the functional rail: with link chain, Velcro or fastening coils
- Cable exits on the desk surface for equipment cabling options

ERG00033

Office organisation and technical integration are enabled with a wide range of individual, configurable desk pedestals.

- 1 Desks are afforded a high load rating with a strong (50 mm) steel frame and a postformed desktop (70 mm).
- 2 The patented quick connect system guarantees simple and strong link-up of desk, cabinet and corner elements.
- 3 An easily assembled cable duct provides covered vertical routing of data and power supply cables.
- 4 Tapped thread in the top end of the extrusion allows adapters to be mounted for practical accessories.
- 5 Additional work and storage surfaces are created with desktop superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level or lighting fixtures.
- 6 Cable Routing Set (CRS)
Quick and easy cabling with the cable routing set in the vertical cable duct under the worktop.

All workstations are also available in ESD version as required.

Technical data

Material / Finish

- Desk frame, sheet steel, zinc passivated
- Three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop covered with high pressure plastic laminate
- Desk legs, extruded aluminium, powder-coated texture
- Cover panels, three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Drawer trims and drawer handles, plastic (PS)

- Legs: RAL 5008, grey blue
- Cover panels, drawer trims and drawer handles: light-grey

Load rating

Tested static surface load, 1500 N

Standards

- DIN 68761 for worktops
- EN 438 HGS class for high pressure plastic laminate

Note

Please order socket strip separately

Colour

- Final digit of order number .1:
- Worktop: light-grey (similar RAL 7035)

How supplied

- Knürr Dacobas® desks and combi desks are fully assembled
- Knürr Dacobas® add-on desks are supplied separately in modules

INFO

Please Note:

Further surface/color combination on request.

E.g.: Profiles RAL 7021 (dark grey) combined with maple or beech worktops.

Please ask for details!

Space management made easy!

Four basic modules enable room layouts for the most diverse applications:

A Knürr Dacobas® Combi Desk 19" Pedestal

B Knürr Dacobas® Trapezoid Corner

C Knürr Dacobas® Combi Desk with Office Pedestal

D Knürr Dacobas® Superstructure

E Knürr Dacobas® Rear Panel

F Knürr Dacobas® Plexiglas Doors

ESD Workstations

- When computers go crazy, alarm systems no longer function or cash registers simply refuse to work, the gremlin at work is quite often easy enough to identify: Static Electricity.
- The constant development of highly integrated circuits results in increasingly more efficient (but also increasingly smaller!) equipment. Therefore it is all the more important to determine the growing sensitivity of **electrostatic sensitive devices (ESD)**. Even voltages of just 100 – 200 volt are enough to damage microprocessors or MOSFETs.
- High voltages are often triggered by modern plastics, artificial fibres in clothing and carpets, and by low humidity in centrally-heated rooms. Depending on the shoe material, speed and humidity, a person walking across a carpet can be loaded with between 2000 and 20,000 volts.
- There is no doubt about it! The safety of electronic components (not to mention the well-being of the operating personnel) can no longer be guaranteed under these conditions.
- With the **ESD workstations from Knürr**, the perfect operational workstation equipment is now available.
 - Site insulation in accordance with VDE 0100, § 24 and DIN 57 680 part 2.
 - Protection of electronic components against static electricity (EN 61340)
- Knürr Technical Furniture is happy to offer you a holistic solution that covers all different aspects of a state of the art ESD workplace.

The Basics

Generation of electrostatic charges cannot always be prevented. Therefore the discharge must be specifically “influenced”. Influenced means: All discharge processes must be run controlled and calculable.

The calculable discharge process is described by the following exponential function:

$$U(t) = U_0 \cdot e^{-t/RC}$$

U_0 = Initial voltage of the capacitor

R = Leakage resistance

C = Capacity

By activating the equation towards R , an equation is generated with which an ideal leakage resistance can be ascertained.

$$R_e = \frac{t_{zul}}{C \cdot \ln(U_0/U_{zul})}$$

The optimal discharge curve is consequently achieved. Assuming that the voltage (U_0) must be reduced within 0.1 sec (t_{zul}) to 50 V (U_{zul}) so that the electrostatic endangered components are not under high voltage for too long, the leakage resistance therefore acts as the regulator for a controlled discharge.

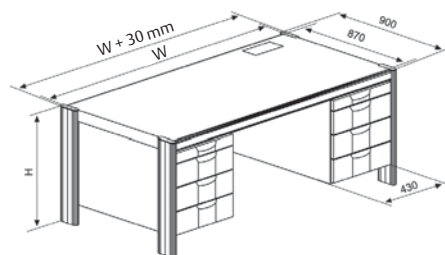

Of course, for the safety of the endangered components it is also helpful if charges can be prevented before they are generated by equalising the different potentials. Conductive work and unit surfaces, plastic parts made of conductive materials, the connection of all parts with one another and with the ESD body are all required for this purpose.

Knürr Dacobas®

19" Cabinets

Technical systems are not installed in large numbers directly in the workstation system for the most diverse reasons, but rather alongside or in a special central technical room.

In order to ensure that furniture system and 19" cabinet system are compatible with each another, Knürr Dacobas®

provides a correspondingly designed 19" range.

Knürr Dacobas® is additionally rounded off by an accessories range, which covers other special applications.

color choice

Knürr Dacobas® 19" Cabinets

Strong points

- 1 Ergonomic locking lever for secure access control
- 2 Closed top cover, top cover with openings for fan trays or cable entry from above
- 3 Easily removable and lockable side panels (Key locks on demand)
- 4 Maximum flexibility grace to adjustable 19" profiles (340 mm - 790 mm in steps of 25 mm)
- 5 Integrated HU markings show equipment's position in the rack
- 6 Preperforated cover panels allow for cable entry or closed bottom as required
- 7 Clean intake air grace to quick changeable filter cassette
- 8 Heavy duty twin castors for 300 kg mobile load rating
- 9 Heavy duty levelling feet for 1000 kg static load rating

More advantages:

- Fits seamlessly into a line of Dacobas consoles
- Choose from aluminium T-slot or steel square hole 19"-profiles
- Integrated electrical grounding concept according to VDE 0100
- Knürr T-Slots on all profiles allows to add accessories virtually anywhere
- Doors:
 - Tempered Safety Glass for protection an visual access
 - Perforated for best aeration
 - Plain steel door for best protection
- Loads of accessories

Knürr Dacobas® 19" Cabinets for Components in Accordance with DIN 41 494

Technical data

Material / Finish

- Cabinet extrusions: extruded aluminium, powder-coated texture
- 19" Extrusions: extruded aluminium (T-Slot) or 1,5 mm Sheetsteel square holes
- Top cover, covers and rear door: sheet steel, powder-coated texture
- Top cover and base frame: sheet steel, powder-coated texture, RAL 9011 graphite black
- Plate feet: plastic

External dimensions

- Width 570 (600) mm
- Depth 870 (900) mm
- Height 1298 mm - 2187 mm

Colour

- Final digit of order number .1:
- Top cover, covers and rear door: RAL 7035, light-grey
 - Cabinet extrusions: RAL 5008 grey blue
- Final digit of order number .9:
- Top cover, covers and rear door: RAL 7035, light-grey
 - Cabinet extrusions: RAL 7021 dark grey

Tests

- Earth, VDE 0100
- Upgrade capability in accordance with protection rating IP 50

Configuration

- Stationary with levelling feet
- Mobile on double castors

Note

2 Cabinets can be optionally linked-up via 2 daco posts or directly linked via 1 daco post. With direct linking, the internal side panels are not used. Chassis runners and 19" shelves can be installed. Socket strips must be ordered separately.

Supply schedule

- 1 Basic rack with 2 side panels, 4 plate feet, 4 cabinet extrusions and 4 19" extrusions with T-slot
- 1 Top cover, closed
- 1 Rear panel with vent slots, lockable

How supplied

Fully assembled

Knürr Dacobas®-19"-Rack

19" Options

- Accepts equipment according to EIA-310 respectively DIN 41 494
- Front and rear 19" profiles are depth adjustable in steps of 25mm
- Base frame available with castors or levelling feet
- Lockable doors with perforation, tempered safety glass or plain
- Ships by default with aluminum T-slot 19"-profiles, also available with steel square hole 19"-profiles
- 4 x 19"-profiles with HU marking for easy installation of equipment
- Removable top cover and side panels
- Doors can be changed from left to right hand opening
- Max. load: 1000 kg (1to) static, 300 kg mobile

Knürr Dacobas® 19" Cabinet Type B Without front door, D 870 mm

- For components in accordance with DIN 41 494
- With fixed 19" component on the front and rear
- Foot frame with plate feet or twin castors
- Lockable rear door with perforations
- Cabinet extrusions
- 4 x 19" Extrusions with tape measure for adjusting installed components
- Side panels removable

Only for controlled version:

- Settable reference temperature (20° to 55°C)
- Speed control, 30 to 100%, with sensor break 100% rotation
- Individual fan monitoring
- Floating common alarm output for excess temperature alarm and fan failure
- Optical status display for O.K., excess temperature and fan failure
- Acoustic warning incl. reset button

Material

- Housing: Sheet steel, high-grade steel grid

Finish

- Zinc-passivated
- Only for controlled version:**
front panel, powder-coated, RAL 7035 light gray

Characteristic curve for controlled version see below left

Electrical supply

- 207...253 VAC; 50/60 Hz

Supply schedule

- 1 CoolBlast fan unit®
- 1 mains cable, 3 m with safety plug (230 VAC)
- Mounting material
- Operating instructions
- Only for controlled version:**
1 sensor cable, 2 m (plug-in)
1 signal cable, 2 m (plug-in)

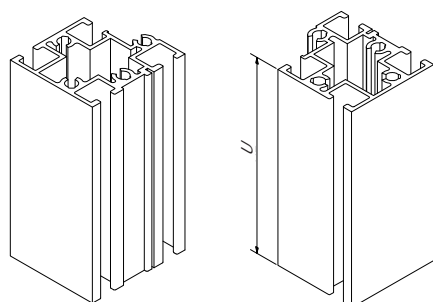

How supplied

- Assembled, wired and tested

Note

- if applicable please order country specific mains cable
