DAA20007

DAA20006

Knürr Dacobas® Advanced Strong Points

■ Standards Compliance

Dacobas Advanced meets DIN EN ISO 11064. This means that the operator works at a console that not only fulfills standards but also gives the space and comfort basic to efficient and professional operation.

■ Straight or lowered Worktop

All Console Elements are available with straight or lowered worktops. Even Straight Corner Elements - that may be used to place a printer on - can be combined with a row of lowered worktops.

■ Silent, passive ventilation

Knürr brings profound knowledge of Thermal Management into this product: Correctly positioned ventilation openings allow for natural convection and reduced background noise.

DAA20008

■ Tailor-made systems

Bespoke spacers scale the row of consoles exactly to the required dimensions. Straight, cornered and circular layouts can both be produced in a convex or concave (theatre) layout.

■ Maximum Stability

30-year proven sturdiness of Dacobas Extruded Aluminium Profiles and welded sheet steel make Dacobas Advanced the reliable and stable choice for your control room.

■ Different Worktop Depths

Dacobas Advanced is designed to accommodate large Workstations in the technical pedestal. Larger devices and 19"-equipment find their place in the 1200mm deep version.

■ Integrated Technical Pedestal

The integrated technical pedestal can be accessed both from front and rear. Choose from hinged or slide-in doors as well as perforated sheet steel for ventilation or plain wooden doors for best sound absorption. Hinged doors can be equipped with PC-trays for easy access.

DAA20009

Usable dimensions of technical pedestal

DAA20010

■ Convenient Cable Management

In option: Front and rear hinged cable runners. Snap In allows for easy and toolless mounting. Two cable runners separate power and network cabling. Existing depth struts of the basic frames already come with the necessary connectors.

■ Tailored Worktops

Worktops of up to 3600mm at a stretch reduce gaps and seams. Talk to our engineers in order to have the worktop made from one piece per workplace.

DAA20011

■ Ships Flat Packed

All components are shipped preassembled and flat packed in order to reduce shipping volume as well as space and time demand during the transport and installation process.

■ Easy to assemble

The exclusive use of standard screws allows for a quick installation on site. Comprehensive assembly manuals explain the set up process.

DAA20012

DAA20013

■ Future proof Modularity

Add new consoles to an existing row, change your current installation or grow up with new accessories. The modular design and the ubiquitous T-Slots leave you all options for future upgrades.

DAA20014

Three steps to your personal console:

Step 1 > Substructure

DAA20015

Basic Assemblies (p.11)

DAA20017

Hinged- and slide-in Doors (p.13)

DAA20016

Link Up Side Elements (p.12)

DAA20018

Basic Frames (p.13)

Step 2 > Worktops

Have your individually designed worktop of up to 3600mm while respecting the following factors:

- location of workplaces
- transport and handling
- dimensional constraints

See p.14

DAA20061

Worktop

DAA20019

One-piece worktops and free choice of corner angle

DAA20020

Circular Worktops

Step 3 > Monitor mounts

Functional Rail to mount between Dacobas Profiles

Chose the Profile Extension that fits your individual TFT setup. Perforated Rear Panels to install between the Profiles are found on p. 16

DAA20021

Add on Functional Rail

Freestanding solution for maximum flexibility with circular consoles. Also available with electrical Height Adjustment for improved comfort.

DAA20022

Add on Monitor Poles

The slimmest solution for tidy and unobstructed installation of standard monitors. Poles can be placed virtually anywhere on the worktop. Multi-TFT solutions available. See p.16.

DAA20023

DAA20024

Surface Colors:

Dacobas Advanced is available with two standard color patterns that easily can be identified by the last digit of the part number:

DAA20025

.1 Light grey

A Light grey worktop is enclosed by a black ErgoSoft Edge at the front and black plastic edge veneers. All sheet steel parts are powder coated in RAL7021 Dark grey, all extruded aluminium profiles – except those in the front leg space – are powder coated in RAL9006 White Aluminium.

DAA20026

.5 Beech

While the Worktop is finished with Beech, all other parts of the console show the same color pattern as with the Light grey worktop.

DAA20027

Nano:
Bianco malé

DAA20028

Nano:
Grigio Londra

Please take note of our new Nano-Surfaces which feature extremely low reflectivity and a velvet smooth touch!

Many further materials for worktops available for request.: E.g.: Corian®, Solid Core Board, Wood, etc.

DAA20015

Linear

90°

90° Trapezoid

Circular

DAA20029

Dimensions in mm: W = Width
H = Height
D = Depth
h = Installation height
d = Useful depth
L = Length

HU = Standard height unit, 1 HU = 44.45 mm
19" = 482.6 mm, (ideal for 19" components in acc. with DIN 41494)
UP = Unit of packaging

Conversion: 1 inch = 25,4 mm

Basic Assemblies

In order to bring quotations faster to your desk and to make Dacobas Advanced easily understandable you will find below a helpful overview of the most common Basic Assemblies. Each Basic Assembly consists of Starter-, End- and Link Up-Side Elements as well as the respective number of Basic Frames. Planning, configuration and order of any setup should always start with one of the below Basic Assemblies. The next step is to choose the right quantities of Link Up Side-Elements, Basic Frames, Cover Panels, Doors, Worktops and completing the setup with accessories.

When extending a Basic Assembly with further Basic Frames, the second End-Side Element moves to the End of the row.

Linear Basic Assemblies

Linear Basic Assemblies always consist of two Basic Frames W1230, one Start-, one Link Up- and one End-Side Element. Starting from W630, any shorter or longer Basic Assemblies can be created from a corresponding selection of W630 or W1230 Basic Frames.

45°-Basic Assemblies

45°-Basic Assemblies consist of two Basic Frames W1230, one Start-, two Link Up- and one End-Side Element as well as front and rear 45°-Cover Panels.

90°-Basic Assemblies

90°-Basic Assemblies consist of two Basic Frames W1230, one Start- and one End-Side Element, one 90° Corner Element.

90°-Trapezoid-Basic Assemblies

90°-Trapezoid-Basic Assemblies consist of two Basic Frames W1230, one Start- and one End-Side Element, one 90°-Trapezoid Corner Element with 600mm front edge.

Circular Basic Assemblies

Circular Basic Assemblies (R3000) consist of two Basic Frames W1230, one Start-, four Link Up Side Elements with short feet and one End-Side Element, fitting front and rear Cover Panels.

Please note

All of the above Basic Assemblies and corresponding worktops can be extended to up to 3600mm at a stretch. Instead of the before mentioned basic frames W 1230 mm you can also use basic frames W 630 mm!

Further helpful accessories as

- Cable Management
 - Power Strips
 - Lighting
 - Seating and Ambient Furniture
- can be found in our catalogues.

DAA20030

Link Up Side Elements

All Side Elements are available for 1050 and 1200mm deep consoles as well as for straight and lowered worktops. Side Elements between Basic frames give optimum rigidity to rows of consoles.

Side Elements are made from rigid, welded adjustable feet, front and rear aluminum profiles with T-slots and depth struts with lashes for the flexible installation of Cable Runners.

Within rows of consoles, Link Up Side Elements with short feet are available.

- **Material**
 - Sheet steel, powder coated
 - Extruded aluminum profiles, powder coated

- **Surface**
 - Feet: RAL7021 Black grey
 - Vertical profiles (rear): RAL 9006 White aluminum

DAA20039

Perforated hinged door

DAA20040

Hinged door

Doors

The Dacobas Advanced Program offers various ways of closing the front and rear side of the Basic Frames:

- Plain hinged or slide-in doors made from particle board.
 - Perforated hinged or slide-in steel doors
- Well placed ventilation openings in the upper and lower part of the perforated doors allow for cooling through natural ventilation. Plain doors offer additional acoustic dampening when feeding cool air into the technical pedestal from a ventilated raised floor. All steel hinged doors come with thread holes for the installation of CPU-Trays at the inner side and always fit for left or right installation. Pushlocks offer access restriction in standard and can be replaced against locks if required.

- **Material**
 - Sheet steel doors: 1,0mm Sheet steel, powder coated
 - Wooden doors: Direct laminated 3-layer quality particle board 19mm
- **Surface**

Worktops

Premium worktops made from quality 3-layer particle board with a durable HPL-coating. 30mm Strong main worktops contribute to the rigidity of the construction. Lowered monitor levels made from 19mm direct laminated panels allow for reduced transport weight and handling with ease.

Select the correct worktops to complete your Dacobas Advanced installation. Please note that all worktops are template articles for the project specific creation of your tailored worktop. All tailored worktops can be produced at a stretch to up to 3600mm.

90° Trapezoid Corners always have their own trapezoid worktop.

All other corners' worktops consist of a left and a right worktop with their edges meeting along the bisector line of the respective corner.

The well-known ErgoEdge at the front side makes working comfortable. All other sides are covered with a durable ABS-edge veneer.

Please note:

Standard worktops are always equipped with cable inlets at the rear side in order to fit with Functional Rails on Dacobas

Profile Extensions (see p. 7). When installing other Monitor Levels, we offer corresponding individual placement of cable inlets. The required openings are cut before shipment. Please always order worktops together with your choice of Monitor Level.

Further helpful accessories as

Monitor Mounts

Flat screen monitors are the main interface in today's control rooms between operator and system. According to ergonomic principles, monitors should always be easily adjustable towards the user and allow for quick change in order to reduce maintenance time to a minimum.

Dacobas Advanced Control Room Consoles can be equipped with the following monitor mounts while keeping all flexibility:

Add on Monitor Poles

- For single or two story installation
- Free placement on the worktop
- Best view on everything behind the console

Functional Rail on Dacobas Profile Extensions

Large range of accessories like monitor

arms, lighting, and much more make the Functional Rail a versatile platform. Mounts between two vertical profiles and a perforated rear panel.

Functional Rail Add on Monitor Level

Besides the various options of the standard Functional Rail, this version also offers an electric height adjustment in option. This allows a better view on videowalls behind the console.

For additional information see also our catalogue "Ergonomic Flat Screen Supports".

Functional rail adaptors

Mounting Adaptors for Lamps

- Important information**
 - Our workstation lamps are supplied as standard with a universal adapter.
 - Please order the corresponding adapter for the respective piece of Knürr furniture for your lamps.

- Versions**
 - Functional rail
 - for Installation on functional rails as used with Ergocon, Elicon or Dacobas
 - Dacobas Type 1
 - for front end installation on Dacobas profiles
 - Dacobas Type 2

- for lateral installation on Dacobas profiles at any height
- Elicon Type 1
 - for front end installation on Elicon profiles
- Elicon Type 2
 - for lateral installation on Elicon profiles at any height

- Supply schedule**
 - 1 Adaptor
 - Mounting material

- Colour/Surfaces**
 - Plastic / Aluminium powder coated
 - RAL 9006 white aluminium

Minela Flex

This luminaire thinks for itself, switching off automatically after 14 hours and therefore preventing unnecessary power consumption. The LED luminaire also features cleverly designed thermal management, which ensures high energy efficiency, longer service life and less heating up of the luminaire head.

- Light and easy to adjust to your individual position
- Switch-off and dimming with a light touch of the touch-LED
- Intelligent Auto-Off function reduces power consumption
- Maintenance-free LED technology with a service life of up to 50,000 hours and more

Technical data

- 1 x HIGH POWER LED
- Color temperature neutral white 4,000 K
- Light control via reflector

- Colorless anodized aluminum housing, acrylic screen
- Metal flexible tube for at least 20,000 movements
- Illuminated touch-LED integrated in the luminaire head for On / Off and dimming
- System of protection IP20; class of protection II
- Supplied with 2.5 m mains lead and with mains plug type CEE 7 / 16 (Euro plug), BS 1363 and NEMA 1-15P
- Various fastenings as accessories

Colour

Aluminium anodized

Supply schedule

1 Minela flex
(Please always order mounting adapter of choice, see page 20)

Knürr Lumax LED lamp Workstation or system installation

- State of the art LED-Modules for highest efficiency
- Glare free
- Photometric properties checked according to DIN EN 13032-1
- Overdimensioned LED-Modules allow for dimming in the first years of use and thus grant extremely longevity
- Dimmable with „Touch DIM“ feature via push button on the lamp or at tabletop
- Perfect fit for Knürr consoles (adaptors for Knürr's multi functional rails)
- 20° tiltable
- Neutral white 4.000 K

Material

Sheet steel powder coated

Dimensions

Width: 1140mm/1700mm
Height: 30 mm (without adaptors)
Depth: 100mm

Color combinations

- Lamp and supports : iron metallic microstructure
- Side panel: Aluminium RAL9007 microstructure

Supply schedule

- 1x LED lamp with integrated LED driver
- Version with offset switch: 1x module with external push button for switching and dimming
- Overhead system lamp: with adaptors to Knürr's multi functional rail
- 1x Schuko lead (3m)
- Mounting material
