

Knürr Synergy®

The New Product Family For Uniform Equipment In Your Control Room

Knürr Synergy®

The New Product Family

Knürr offers a product family for uniform equipment and furnishing in the control room in a full-coverage modern design.

In **Knürr SynergyConsole®**, **Knürr SynergyWall®** and **Knürr SynergyCart®** unmistakable design elements complement one another to provide user-oriented technology. Everything functions as if from one single cast, and rounds off the image of a modern control or measuring station.

The modern **Knürr Synergy®** control room concept actively contributes to **increased efficiency** through better attentiveness. Less fatigue and full employee concentration are the requirements for effective working in safety-relevant areas.

The well-balanced contouring of the new **Knürr Synergy Console®** offers ideal dimensions for monitor workstations and supports the cockpit arrangement of flat screens.

The basic console is already manually height-selectable. The power-operated height-adjustable **Knürr Synergy Console®** is a **sit-stand workstation** that optimally meets current requirements and specifications. The control room is consequently equipped for the future.

Knürr SynergyConsole® Strong points

■ Standards compliance and ergonomics

The fully compliant ergonomic leg space enables free movement of the chair in the link-up area.

Spacious 1000 mm desk depth for placing large monitors.

Compliance with the latest standards and specifications:

- Manually height-selectable, even in the basic version (650 – 850 mm)
- Electric height-adjustable, from 650 to 1250 mm

■ Manually height-selectable, even in the basic version

Even height-selectable in the basic version is manual via locking bolts, from 650 mm to 850 mm.

The height is pre-mounted at the factory and can be changed later on.

SYN20041

■ Electric sit-stand setting

- Running very quietly and smoothly, the work height can be set individually and stepless between 650 and 1250 mm
- Stepless height adjustment and quiet lifting mechanism
- Individually programmable height positions and speeds for various users
- Intermediate stop and slow mode when nearing end position
- Overload protection with individual current limiting
- In service cases: Fault identification with special codes, remote

diagnostics setup, automatic detection of drives, swapping out the lifting columns during running operation, free access from outside via the removable side panels

■ Ergonomic and robust desktop edge

- Warm synthetic materials ensure a pleasant surface temperature to positively influence the user's sensation and perception on touching and seeing the surface
- Durable and robust materials ensure long service life
- The solid-colored material precludes visible damage

■ Ergonomically designed worktop shape

- The worktop specially designed for the Knürr SynergyConsole® sit-stand model provides ideal dimensions for monitor workstations and supports the cockpit arrangement of desk monitors

■ Material mix synergies

Wood as the material used and the ErgoEdge desktop edge provide a pleasantly warm surface and therefore contribute to the employees' wellbeing.

SYN20031

SYN20033

SYN20029

SYN20032

The interface to the technology feature robust aluminum and sheet steel to guarantee reliability and failure safety. The durable plastic cap as the stabilizer foot's end piece protects footwear and the stabilizer foot's surface coating, as it is made of a robust but sufficiently soft material. The Knürr SynergyConsole®'s exceptional eco-balance is clearly evident as all materials can be separated and recycled.

■ Cable routing

- The side covers of the desk side panels and the front and rear covers of the technical pedestal can be completely removed for cabling and installing equipment and devices
- Hidden and dust-protected cable entry from the monitor right into the technical pedestal
- Separate horizontal and vertical cable routing in cable basket trays and cable routing rings
- Cable duct bottom cover opening from the raised floor into the technical pedestal or into the side panels
- Spacious cable tray under the worktop for housing socket strips, switches and KVM extenders
- Cable chain pre-integrated into the sit-stand version in a side panel
- Spacious, two-way cable chain with separator available for additional cable routing between technical pedestal and cable trough; can also be mounted on the perforated rear panel

■ Flat screen adaption

- The docked monitor level with cover for fixing flat screen holders provides space for additional equipment and cables
- Also accessible with wall positioning
- The ergonomic monitor connection with depth-adjustable flat screen arms exclusively designed for the Knürr SynergyConsole® guarantees optimum viewing distances to the monitors
- Freely positionable monitor columns for horizontal setting
- Freely positionable heights for flat screen arms on the monitor columns

■ Spacious technical pedestal

- Excellent accessibility with removable front and rear covers
- For accepting 19" frames, mounting braces, chassis rails, computers and further equipment with full legroom in the width and depth

- Cables can be routed via the cable basket tray to the side panels through generously dimensioned outlets – separated for data and power supply
- The mounting braces enable the individual connection of non-standard equipment

■ Modular construction

Industrially produced modules can be upgraded and added to at all times; available to buy for many years to come
All installation modules are suitable for both the basic version and the sit-stand version.

SYN20042

SYN20034

Knürr SynergyConsole® Workstation System

Side panels

- The combination of interconnecting aluminum extrusions is the basis for the variable desk heights
- Height setting in the basic version is manual via locking bolts, from 650 mm to 850 mm
The height is pre-mounted at the factory and can be changed later on
- The electric-adjustable sit/stand version is fitted with 4 lifting columns for a high load rating and a stepless setting range from 650 to 1250 mm
- Easy to remove sheet steel covers ensure good accessibility to cabling and lifting columns
- Welded stable sheet steel stabilizer feet for optimum stability; durable plastic impact caps protect both footwear and the stabilizer feet
- Short stabilizer feet on the link-up desks enable maximum leg space

Desk tray

- The spaciously dimensioned sheet steel desk tray under the worktop ensures high stability and provides plenty of space for switches, cables and power supplies
- Good accessibility via the side panels, from the rear and below via cut-outs
- Connection option for a spacious cable chain, left and right
- With cover at the rear including brush strip for dust protected and out-of-view cabling (not required with mounted monitor level)

Worktops

Worktops with the tried, tested and proven ErgoEdge impact edge with HP laminate surfaces enable high load ratings and ensure a long console desk service life.

The worktops are continuous or off-set by 70 mm through elevating the front worktop compared to the rear worktop.

Monitor level depth: 400 mm.

Finish

Basic frames:

Vertical extrusions on the side panels, desk tray, worktop stabilizers, monitor level, monitor columns and flat screen holders: RAL 9006 white aluminum

Covers, stabilizer feet and foot caps: RAL 7021 dark gray

Worktops:

.1: Worktop coating in RAL 7035 light gray, ErgoEdge impact edge and veneer in RAL 7021 dark gray.

.5: Worktop coating in beech design, ErgoEdge impact edge and veneer in RAL 7021 dark gray.

.9: Worktop coating in basalt gray ErgoEdge impact edge and veneer in RAL 7021 dark gray.

Replace „x“ with the number of your color choice

Material

- Vertical supports on the side panels, monitor level and monitor columns, extruded aluminum, powder-coated
- Covers, stabilizer feet, desk tray and flat screen holders sheet-steel, powder-coated.
- Plastic impact protection caps
- Worktop: Three layer particle board, FP / Y E1 version, fire protection class B2
- Worktop coating: High pressure plastic laminate

SYN20082

Knürr SynergyConsole® Sit-Stand Workstation with electrically operated sit-stand adjustment

- Continuous freeform worktop, ergonomically shaped for optimum viewing angle with flat-screen work, with ErgoEdge impact edge
- The most modern lifting mechanism possible ensures the worktop moves up and down quietly and stepless
- Intelligent and hidden cable management
- Patented ErgoEdge desk edge provides a pleasant surface temperature
- Modularity: Installation option for perforated rear panel, technical pedestal or monitor level
- Plenty of room for cables, switches and power supplies in the generously dimensioned desk tray
- Desk tray with cover at the rear including brush strip for dust protected and concealed cabling (cover not required with mounted monitor level)

Material

- Extruded aluminum side panel vertical supports, powder-coated
- Sheet steel covers, stabilizer feet, desk tray and worktop stabilizer, powder-coated
- Plastic impact protection caps
- Worktop: 30 mm three layer particle board, FP / Y E1 version, fire protection class B2
- Worktop coating: High pressure plastic laminate
- Plastic ErgoEdge desk edge

SYN20086

Knürr SynergyConsole® Link-up/End Desk

Height-selectable with lowered monitor surface

- For linking up or closing off after a corner piece
- Can be further linked up with an add-on desk
- Side panel on the left with shortened stabilizer feet for maximum leg space in the link-up area
- Split worktop with ErgoEdge desk front edge
- The worktops are off-set by 70mm through elevating the front worktop compared to the rear worktop
- Monitor level depth: 400 mm
- Easy set desk heights via bolt locking in the side panels
- Intelligent and concealed cable management
- Patented ErgoEdge desk front edge provides a pleasant surface temperature
- Modularity: Installation option for perforated rear panel, technical pedestal or monitor level
- Plenty of room for cables, switches and power supplies in the generously dimensioned desk tray
- With cover at the rear including brush strip for dust protected and out-of-view cabling (cover not required with mounted monitor level)

Material

- Extruded aluminum side panel vertical supports, powder-coated
- Sheet steel covers, stabilizer feet, desk tray and split worktop stabilizer, powder-coated
- Plastic impact protection caps
- Worktop: 30 mm three layer particle board, FP / Y E1 version, fire protection class B2
- Worktop coating: High pressure plastic laminate
- Plastic ErgoEdge desk front edge

Finish

Basic frames:

Side panel vertical extrusions, desk tray and split worktop stabilizer:

RAL 9006 white aluminum

Covers, stabilizer feet and foot caps:

RAL 7021 dark gray

Worktops:

Knürr SynergyConsole® Corner Piece

- With support arms for direct connection on the worktop stabilizer of the linked-up desks
- Patented ErgoEdge corner piece front edge provides a pleasant surface temperature
- Modularity: Installation option for perforated rear panel or monitor level
- Plenty of room for cables, switches and power supplies in the generously dimensioned corner piece tray
- Additional vertical cabling possible via the rear support foot
- Corner piece tray with cover at the rear including brush strip for dust protected and out-of-view cabling (cover not required with mounted monitor level)

Material

- Sheet steel support foot, support arms and corner piece tray, powder-coated
- Corner worktop: 30 mm three layer particle board, FP / YE1 version, fire protection class B2
- Board coating: High pressure plastic laminate
- Plastic ErgoEdge corner piece front edge

Finish

Corner piece tray, support foot and support arms: RAL 9006 white aluminum

Corner piece panels:

- .1: Worktop coating in RAL 7035 light gray, ErgoEdge impact edge and veneer in RAL 7021 dark gray
- .5: Worktop coating in beech design, ErgoEdge impact edge and veneer in RAL 7021 dark gray
- .9: Worktop coating in basalt gray, ErgoEdge impact edge and veneer in RAL 7021 dark gray

Knürr SynergyWall® Strong points

- **Functionality and style:** A product family for uniform equipment and furnishing in the control room in a full-coverage modern design.
- **Spacious cable management** with plenty of space for switches, cables and power supplies. Completely covered from screen through to raised floor.
- **Modular setup** – industrially produced modules can be upgraded and added to at all times; available to buy for many years to come.

■ **Application areas for the Knürr SynergyWall®**

- TV studios, news studios
- Process display in control rooms, control and measuring stations
- Network Operation Centers (NOCs)
- Data centers – computer monitoring
- Operation control centers – police, fire department, rescue services
- Municipal traffic monitoring
- Security systems, video monitoring
- Airport and train station information terminals
- Reception areas

■ **Practical benefits**

- Quick and easy to set up
- Monitor change: Effortlessly without any tools – simply hang on monitors!
- Highest possible stability, even with large span widths
- For all monitor sizes; different sizes can also be mixed
- Straight wall or cockpit solution (10°)
- Low installation depth/lower space requirement – good fit for small control rooms
Option: Without stabilizer foot at the rear
- The monitor wall can be positioned in the room, regardless of what the room is made of
- Optional rear and front panel covers provide optimum protection for cables and plugs
- Optional pedestals provide space for computers, power supplies and documentation
- Extension option with short cross extrusion for additional displays
- Monitors can swivel up to 15° in four positions

INFO

Please Note:

We also offer LCD-screens for 24/7 use in control rooms as well as professional video control hard- and software in corporation with our well known partners. **Please let us know your requirements!**

Knürr SynergyWall® Cross Support

- For straight linking or in 10° angle
- Extruded aluminum stable cross support
- Depth-adjustable for optimum monitor arrangement
- Spacious cable management with plenty of space for switches, cables and power supplies
- Economical cable routing integrated in the cross support
- With T-slots for mounting Knürr DI-STRIP® socket strips and cable routing elements
- New: Short, stable cross extrusion, for small displays
- Internal or external on the side panels, and depth adjustable

Material

- Cross extrusion: Extruded aluminum, powder-coated
- Adapter plates – aluminum, powder-coated

Finish

- RAL 9006 white aluminum

Dimensions

- Height: 120 mm
- External depth: 60 mm
- Width: 1900 mm, for 2 displays 1016 mm (40")

Supply schedule

- 1 cross extrusion
- 2 adapter plates for connecting on the side panels
- Cross support length – 400 mm:
- 1 adapter plate, 1 closing panel
- Mounting material

How supplied

- Flat-packed kit

Knürr SynergyCart® Strong points

The functional solution

- IT cart for hospitals (ward cart)
- Equipment cart for health care
- Test cart in production/workshops
- Storage consignment, scanner cart
- Ideal for automotive and industrial projects where small, space-saving carts with cable management are required
- The unmistakable design is harmonized with the Knürr Synergy® product family
- Fully assembled and turnkey ready for use
- Tested in accordance to the DIN EN 60601_1
- Strong, and yet attractively designed sheet steel basic frame with vertical extruded aluminum supports for the highest possible safety and stability
- ESD versions of all modules available
- Modern, smooth-running double wheel castors in conductive version
- Ergonomics in detail:

All modules can be mounted at any height, absolutely in accordance with the user's individual wishes

- User-friendly cable management with plenty of room for cables, socket strips, isolating transformers, cable exit to the front over the entire height

Material

- Sheet steel/extruded aluminum tube handle
- Cover with master switch optionally
- Aluminum extrusion vertical supports
- Modules can be mounted stepless on the height via T-slots on the aluminum extrusion
- Welded sheet steel base unit
- Spacious cable exit from the supports in the base tray
- Twin swivel castors, Ø125 mm
- Bumper caps

Knürr SynergyCart® Computer Cart

The mobile PC workstation, e.g. for stores, office, lab, training

Material

- Extruded aluminum vertical supports and handle, powder-coated
- Sheet steel basic frame and installation modules, powder-coated
- Plastic bumper caps

Finish

- .1: RAL 7035 light gray
- .9: Base unit, cover for base unit, bumper caps, handle, extrusion cover, worktops, keyboard extension, holder for tower PC: RAL 7021 dark gray
- Vertical extrusion, handle, vertical cable duct, flat screen holder: RAL 9006 white aluminum

Load rating

- Permissible total weight: 125 kg
- Load per worktop: 15 kg
- Drawer load: Housing, 10 kg; extension, 2 kg

Supply schedule

- 1 Knürr SynergyCart® Basic Frame
- 1 vertical cable duct for H 880 mm or H 1,200 mm
- 1 handle
- 1 worktop
- 1 keyboard extension (only with height 1,200 mm)
- 1 flat screen holder
- 1 holder for tower PC
- ESD model with conductive castors and earthing-mounting material
